

Fire Warden Training Invite

◇ Mark Smith, Facilitator

TRAINING OVERVIEW

Automated External Defibrillator (AED)

Each year about 400,000 Americans die of cardiac arrest. The chance of survival declines 8% with every minute that passes. Electrical shock restores a heartbeat and circulation but to survive neurologically intact, rescue must be swift.

The Facilitator will present an overview on the purpose, scope and applicability of an AED program, which will include an understanding of the federal and state law and the importance of a written AED program.

CPR/AED Overview

James (Jim) Milliken, RN, Assistant Director of Nursing with the Tennessee Department of Health Clinical Services and Disease Management will provide insight of the CPR/AED course outline which teaches CPR, the use of AED and relief of Foreign Body Airway Obstruction. Attendees will have an opportunity to sign up for a future CPR/AED Course.

Fire Safety 101

This lesson will provide a format on basic element guidelines to ensure levels of preparedness such as fire prevention measures, evacuation and assembly priorities.

Work Place Violence

The course will provide information regarding the escalating problem of violence in the workplace. It also provides identification of traits and characteristics of potentially violent individuals, prevention and avoidance strategies.

Facilitator Mark Smith is the Director of Campus Environmental Health and Safety (EHS) at the University of Tennessee (UT) in Knoxville. He holds a BS in Environmental Health and Safety, MS in Public Health, is a Certified Safety Professional (CSP), Certified Industrial Hygienist, (CIH), and a Certified Hazardous Material Managers (CHMM).

Fire Warden Seminar
March 20, 2012
09:00 a.m. until 10:30 a.m.
220 French Landing Drive
Nashville, TN 37228

Fire Wardens:

I give accolades to all the STREAM manage complex tenants and fire wardens that exemplify safe practices and procedures as well as ensuring safe evacuation during emergency drills. I applaud the well structured safety committees of each complex that incorporate safety training and provide pre-planning emergency strategies to ensure safe building departure to a pre-designated safe area.

To support you in your concentrated efforts of safe practices, we invite you to our upcoming fire warden seminar. The theme for the event is to recap, reaffirm, and refocus the fire warden responsibilities.

We look forward to seeing each of you .
